

European Control System Security Incident Analysis Network

ECOSSIAN is a European project for the improvement of the detection and the management of highly sophisticated cyber security incidents of critical infrastructures across borders. These preventive functions are being followed within our cooperative effort:

- Threat monitoring
- Early indicator and real threat detection
- Alerting
- Support of threat mitigation and disaster management

The **ECOSSIAN** project contributes to the:

- European Programme for Critical Infrastructure Protection
- Strategy and Action Plan developed by the European Commission
- Worldwide Initiatives on Cyber Security of Industrial Control Systems and Smart Grids followed by ENISA and Member States
